

## TO WHOM IT MAY CONCERN

This is to confirm that the project is abutted to a 60ft wide road and lies within the Deoghar Municipal Corporation area as such the following facilities are in compliance with the requirements of necessary services.

1. Supply water- the project will have its own borewell, however, the water is supplied through Deoghar Municipal Corporation.
2. Sewage/Drainage System- the project will have its own sewage septic tank and soak pit to cater the requisite services.
3. Electricity supply and transformer- three phase electric connection for construction purpose, however, individual flat/shop owners will have their separate electric meters. The building will have its own transformer depending upon the final usage of energy.
4. Solid waste management and disposal- Necessary arrangements shall be made for the waste management and its disposal, however, Deoghar Municipal Corporation has made its arrangements for solid waste management.
5. Fire fighting facility- we have obtained fire guidelines from the State fire department and we confirm to abide by the norms and guidelines directed by the State Fire department
6. Drinking water facility- the drinking water shall be provided through Drinking Water and Sanitation Department, however, we have our own borewells for emergency services.
7. Emergency evacuation Services- the building plan has two lifts and two staircases, in which one is meant for emergency evacuation services, however, we have the third staircase for ground and first floor which is for commercial use.
8. Rain water harvesting- Proper rain water harvesting shall be provided in the building as per govt. norms.
